2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US04/29706

Box No. V Reasoned statement under Rule 43 *bis*.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1-23</u>	YES
	Claims <u>NONE</u>	NO
Inventive step (IS)	Claims <u>1-23</u>	YES
	Claims <u>NONE</u>	NO
Industrial applicability (IA)	Claims <u>1-23</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1 - 23 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest using self-adherent wraps as defined in the application for decorative covering or to camouflage objects. While the self-adherent wraps are known they are used in bandaging or wrapping injuries and not to hide or decorate objects so they are not as noticeable in certain environments.

Claims 1 - 23 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
